Course Details   Edit

Course Content

Course consists of seminars based on material from current research publications.

Required Academic Background

BSc or BA in cell and molecular biology with some understanding of physiology and pharmacology.
Minimum of 100-level understanding of chemistry, but higher level chemistry is a big help.

Relevant Professional Accreditation

No Information

Penalties*

In the event of unexpected adverse circumstances related to personal health or family problems, a medical certificate and/or an aegrotat application (see website above) will be required for the missed or compromised assessment. Points will be taken off for assignments turned in late.

Student Feedback*

Feedback to students includes: discussion and written comments on marked work such as internally assessed data analysis tests, along with individual discussions on performance at the request of a student. Feedback from students will be a request for students to evaluate the BIOL 432 course as a whole or an individual lecturer's contribution to the course.

If you find some text you wish to change, click edit

The significance of the CRN link will be explained in 2 pages.

Student feedback I think is where you say how you have responded to student feedback (not how students receive feedback, which is what we put here) *See final page*

Student Feedback*

This course was last assessed in 2014. Some experiments have since been modified to decrease the workload. Student feedback on University courses may be found at
www.cad.vuw.ac.nz/feedback/feedback_display.php

Communication of Additional Information*

Any additional information about this course will be communicated during lectures and will be posted on blackboard.

Course Learning Objectives   Edit

Preamble*

Students who pass this course will be able to:

Learning Objectives*

| 1 | Understand the relationship between structure and function of proteins, including catalysis and its regulation; and mechanisms and roles of metabolic processes |

RELEASE: 1.0 ()

This "Edit" link near the bottom of the page allows you to edit the learning objectives (CLOs). The edit page will open in a new tab.
